LAS 7 BOLAS DE CRISTAL

DESPUES DE DOS AÑOS DE AUSENCIA LA EXPEDICION SANDERS-HARDMUTH HA REGRESADO A EUROPA.

La expedición etnográfica Sanders-Hardmuth acaba de regresar a Europa después de un largo y fructuoso viaje al Perú y Bolivia. Los exploradores han atravesado terrenos poco conocidos donde han descubierto varias tumbas incas. En una de ellas han encontrado una momia que llevaba puesta la "borla" o diadema real de oro macizo. Algunas inscripciones fúnebres les han permitido fijar con certidumbre que se trata del Inca Rascar Capac.

Piense en todos los egipiólogos que murieron de manera misteriosa después de haber abierto la tumba de este faraón... Verá usted como lo mismo les ocurrirá a los que han violado la sepultura de ese rey Inca.

(1) Véase EL CETRO DE OTTOKAR

No es, propiamente hablando, una enfermedad... Han encontrado a las dos víctimas dormidas, una en su mesa de trabajo y otra en su biblioteca... Después de un primer examen, parece que los exploradores se hallan sumidos en una especie de sueño hipnótico o letárgico.

Además, mire usted esto...

De cristal... Estaban al lado de las víctimas...

Sí, he dejado fragmentos en el laboratorio de la policía científica, donde están examinándolos ahora.

Lo suficiente para descartar definitivamente la hipótesis de una simple coincidencia. Deberíamos enterarnos del resultado del análisis.

El 14... Vamos a ver... Sí, allí estaba el "Pachacamac". Un buque de carga peruano, llegado el 10 con un cargamento de guano. Salio el 14 para El Callao con un cargamento de madera.

¿Qué estoy pensando? Pues, sencillamente, que Tornasol ha sido raptado por Chiquito, un indio peruano, y que está a bordo del "Pachacamac", un barco peruano, en ruta para El Callao, un puerto del Perú.

Entonces, vayamos en seguida allí y salvemosle, arrancándolo de las manos de esos bandidos.

Eso es, saldremos lo antes posible para el Perú, mañana o pasado. Ahora telefonearé al comisario para explicarle lo que sabemos.

Y yo telefonearé a Néstor dándole cuenta de nuestra marcha.
